Seeking an internship to apply analytical and programming skills in a fast-paced environment.

SKILLS

- **Programming Languages:** Python, C++, Java, RISC-V Assembly, SQL,
 - **Trading & Data Analysis:** pandas, NumPy, SciPy, Matplotlib, Tiingo API
 - **Cybersecurity:** Network security, cryptographic protocols, penetration testing basics, malware analysis
 - **Cloud & DevOps:** AWS, Docker, Kubernetes, Linux
 - **Tools & Platforms:** Git, Jupyter Notebook, VS Code, Linux, Neovim
-

EXPERIENCE

Algorithmic Trading with SMA Strategy (*Python, Tiingo API, pandas, NumPy*)

- Developed an algorithmic trading strategy using Simple Moving Averages (SMA) to identify buy/sell signals.
- Integrated real-time financial data from the Tiingo API for backtesting.
- Achieved an [20%] simulated return over a backtested period.

Real-Time Antivirus Protection Software (*C++, Python, Cybersecurity*)

- Designed and implemented an antivirus tool capable of scanning and identifying malicious files.
- Utilized heuristic and signature-based detection methods.
- Optimized scanning performance to run efficiently in real-time environments.

RISC-V Assembly CPU Simulator (*RISC-V Assembly, C++*)

- Built a CPU simulator to execute RISC-V assembly instructions.
- Implemented instruction parsing, memory management, and CPU registers.

High-Frequency Trading (HFT) Bot (*Python, C++, WebSockets, AWS Lambda*)

- Engineered a low-latency trading bot using WebSockets for real-time market data streaming.
- Deployed on AWS Lambda with auto-scaling to handle volatility spikes.
- Achieved an [34%] increase in simulated profit compared to standard trading models.

CERTIFICATE & AWARDS

- AWS Certified Cloud Practitioner (if applicable)
- Certified in Financial Markets by [Institution]
- **Certified Algorithmic Trader (AT) by QuantInsti** – Focuses on algorithmic and quantitative trading strategies.
- **IBM Data Science Professional Certificate (Coursera)** – Focuses on Python, data analysis, and machine learning.
- **GIAC Security Essentials (GSEC)** – Covers network security and cryptography.
